Journal of Membrane Science 110 (1996) 271–272

journal of MEMBRANE SCIENCE

Contents

The self-diffusion of water and ethanol in cellulose derivative membranes and particles with the pulsed field gradient NMR data
V.I. Volkov, S.A. Korotchkova, I.A. Nesterov (Moscow, Russia), H. Ohya, Q. Guo, J. Huang and J. Chen (Yokohama, Japan) 1
Analysis of the transport rates of europium(III) across an organophosphinic acid supported liquid membrane
R.-S. Juang and S.-H. Lee (Taoyuan, Taiwan) 13
Asymmetric TPX membranes with high gas flux
F.-C. Lin, D.-M. Wang and J.-Y. Lai (Chung Li, Taiwan R.O.C.) 25
Membranes for separation of higher hydrocarbons from methane
J. Schultz and K.-V. Peinemann (Geesthacht, Germany) 37
The behaviour of water in poly(dimethylsiloxane)
J.M. Watson and M.G. Baron (Manchester, United Kingdom) 47
The influence of intermolecular interactions on the selectivity of several organic acids in aqueous multicomponent systems during reverse osmosis
G. Laufenberg, S. Hausmanns and B. Kunz (Bonn, Germany) 59
Self diffusion and conductivity in Nafion® membranes in contact with $NaCl + CaCl_2$ solutions
G. Pourcelly, P. Sistat, A. Chapotot, C. Gavach (Montpellier, France) and V. Nikonenke (Krasnodar, Russia) 69
The resolving power of ultrafiltration
A.N. Cherkasov and A.E. Polotsky (St. Petersburg, Russia) 79
Improvement of the performance of facilitated transport membrane process through nonuniformity
L. Lin (Beijing, P. R. China) 83
Gas permeation properties of organosilicon-containing polystyrenes
Y. Nagasaki, Y. Hashimoto, M. Kato (Noda, Japan) and T. Kimijima (Tsukuba, Japan) 91
Pervaporation of ethanol–water mixtures through polyvinyl alcohol–polyacrylamide interpenetrating polymer network membranes unsupported and supported on polyethersulfone ultrafiltration membranes: a comparison
E. Ruckenstein and L. Liang (Buffalo, NY, USA) 99
Performance and pore characterization of nanoporous carbon membranes for gas separation
M.B. Rao and S. Sircar (Allentown, PA, USA) 109
Microfiltration of sodium nitrate and Direct Red 2 dye using asymmetric titanium dioxide membranes on porous ceramic tubes
J.J. Porter and S. Zhuang (Clemson, SC, USA) 119
A model for the permeation of gases in block copolymer membranes with lamellar morphology
V. Premnath (Cambridge, MA, USA) 133

Meetings calendar 139

Microporous silica membranes deposited on porous supports by filtration
L. Chu and M.A. Anderson (Madison, WI, USA) 141
Modelling and simulation of integrated membrane processes for recovery of Cr(VI) with Aliquat 336
A.I. Alonso and C.C. Pantelides (London, United Kingdom) 151
Washing frozen red blood cell concentrates using hollow fibres
F. Castino and S.R. Wickramasinghe (Marlborough MA, USA) 169
Influence of cations on the proton leakage through anion-exchange membranes
Y. Lorrain, G. Pourcelly and C. Gavach (Montpellier, France) 181
Industrial multi-stage continuous filtration process: influence of operating parameters
H. Carrère and F. René (Thiverval-Grignon, France) 191

Study on the microfiltration of *Escherichia coli*-containing fermentation broth by a ceramic membrane filter
S.-L. Li, K.-S. Chou, J.-Y. Lin, H.-W. Yen and I.-M. Chu (Hsinchu, Taiwan) 203
Pervaporation of ethanol–water mixtures through temperature-sensitive poly(vinyl alcohol-*g*-*N*-isopropyacrylamide) membranes
Y.-M. Sun and T.-L. Huang (Chung-Li, Taiwan Republic of China) 211
Extraction of polyunsaturated fatty acid ethyl esters from sardine oil using Ag^+-containing o/w/o emulsion liquid membranes
K. Nakano, S. Kato, H. Noritomi and K. Nagahama (Tokyo, Japan) 219
Visualisation of an ultrafiltration membrane by non-contact atomic force microscopy at single pore resolution
W.R. Bowen, N. Hilal, R.W. Lovitt and P.M. Williams (Swansea, United Kingdom) 229
Atomic force microscope studies of membranes: Surface pore structures of Cyclopore and Anopore membranes
W.R. Bowen, N. Hilal, R.W. Lovitt and P.M. Williams (Swansea, Wales, United Kingdom) 233
Gas permeation through PSF-PI miscible blend membranes
G.C. Kapantaidakis, S.P. Kaldis, X.S. Dabou and G.P. Sakellaropoulos (Thessaloniki, Greece) 239
Characteristics of a zirconia composite membrane fabricated by a laser firing method
H. Ohya, T. Onodera, M. Aihara and Y. Negishi (Hodogaya-ku Yokohama, Japan) 249
Catalytic process of alcohol oxidation with target product pervaporation
A.B. Solovieva, N.V. Belkina and A.V. Vorobiev (Moscow, Russia) 253
Preparation of Pd/ceramic composite membrane I. Improvement of the conventional preparation technique
A. Li, G. Xiong, J. Gu and L. Zheng (Dalian, China) 257

Corrigendum
The effect of the pH on electrolyte transport through microporous membranes bearing either weakly or strongly dissociating acid groups. A theoretical analysis using the space-charge model for a cylindrical capillary, J. Membrane Sci., 99 (1995) 285–302
H.J.M. Hijnen and J.A.M. Smit (Leiden, Netherlands) 261
